

Table 1: Comparative table of *E. oswaldiana* and *E. coccinea*

		<i>Echeveria oswaldiana</i>	<i>Echeveria coccinea</i>
<b>Stem</b>	Length (cm)	12–24	Up to 80
	Diameter (cm)	0.5–1	1–1.7
<b>Rosette</b>	Diameter (cm)	10–14	5–20
<b>Leaves</b>	Form	Lanceolate to oblong, pubescent, purplish green	Oblanceolate, acuminate, greyish-green, pubescent with <u>red edges</u> (5)
	Length (cm)	7.5–8.5	6–8
	Width (cm)	2–2.3	2
<b>Flowering stem</b>	Number per rosette	1	1
	Length (cm)	30–46	30
<b>Inflorescence</b>	Type	Racemose, with 22 to 24 flowers	<u>Racemose with 35 or more flowers</u> (6)
<b>Pedicels</b>	Length (mm)	3–5	2
<b>Sepals</b>	Form	Unequal, filiform	Unequal, linear-lanceolate
	Length (mm)	10–12	13
	Width (mm)	2–3	1–2
<b>Corolla</b>	Form	Subcylindrical, pentagonal	Pentagonal
	Colour	Red, tip yellow	Scarlet red
	Length (mm)	10–12	9–15
	Diameter (mm near base)	7	8
<b>Petals</b>		Elliptic to oblanceolate, cuspidate, keeled, concave and yellow on the inside	Lanceolate apiculate, slightly reflexed towards the apex, <u>pubescent</u> , red to orange on the outside, yellow on the inside (7)
<b>Gynoecium</b>	Length (mm)	8	4–8
	Diameter (mm)	5	4
	Carpels	Pink-yellow, mottled	White
	Style	Pink to lightly brownish, mottled	Purple red
	Stigma	Purple pink and green	Greenish yellow
<b>Nectaries</b>	Form	Lunate	Reniform
	Colour	Pink	White
<b>Chromosome number</b>		Unknown	25
<b>Biogeographic province</b>		Eastern Cordillera (Colombia)	Very wide distribution in Mexico
<b>Habitat type</b>		Cloud forest	Different habitats
